Asaba, Delta State Nigeria

13th December, 2025.

The office of the Manager,
World Agriculture Forum

Dear Sir,

I read and am interested about your advertisement for an internship program in your firm. Please accept this letter and the enclosed resume as my application for this position.

As a recent Computer Science graduate of Cross River University of Technology Calabar, I have solid knowledge of a variety of operating systems, software development tools, and networking and file systems as well as practical experience in these areas. During my cooperative education placements, I had successful experience in developing and debugging PHP code; in fact, during my placement at BigStack Technologies company Calabar, my supervisor told me I was the most efficient student programmer he had ever worked with. When my classes required me to collaborate with other students on team projects, I was nearly always asked by my peers to organize the work and present the results. In addition, I found that my problem-solving skills were enhanced by working as part of a team and by considering other people's ideas.

BigStack Technologies Company is a leader in creating data storage solutions, while at the same time being a small, focused enterprise. Both of these qualities appeal to me greatly. I am actively seeking the kind of challenge offered by working for a technically innovative firm that is small enough to be flexible in response to the market.

I am eager to have the chance to discuss this position with you in an interview. Please contact me at azuama69@gmail.com. Thank you for your attention, and I look forward to hearing from you.

Sincerely

Azuama Odinaka Maximus
